

# RESPONSE To LESSEN The SUFFERINGS

0026

## The NGO World Foundation (TNWF)

### Mission

Live for others

### Vision

To build the world we want to see by effective networking, promoting collaborations and creating models of social good

### Concept

The NGO World Foundation (abbreviated as TNW Foundation) has been established in 2009 as an organization clustering the Non-Governmental Organizations and their representatives willing to join hands in the field of social welfare, sustainable development and strengthening cooperation links within the sector. Since that we are involved in the number of projects aimed at strengthening networking, capacity building, awareness raising, humanitarian support, community development and promoting the collaboration between the NGOs.

The NGO World Foundation is registered under The Societies Registration Act, 1860 (Act XXI of 1860) and from Pakistan with different accreditations including;

- ISO certified for Quality Management System Standards 9001:2015.
- Evaluated and Certified by PCP (Pakistan Center for Philanthropy)
- TAX exempted organization from FBR (Bar Code: 100000052611963).
- Signed MOU with Economic Affair Division (EAD) Government of Pakistan as an organization accepting the foreign funding.

TNWF join hands with public sector organizations, government functionaries, INGOs, UN and other key aid agencies besides drawing its strength from communities active involvement in need driven development process & community based interventions etc.

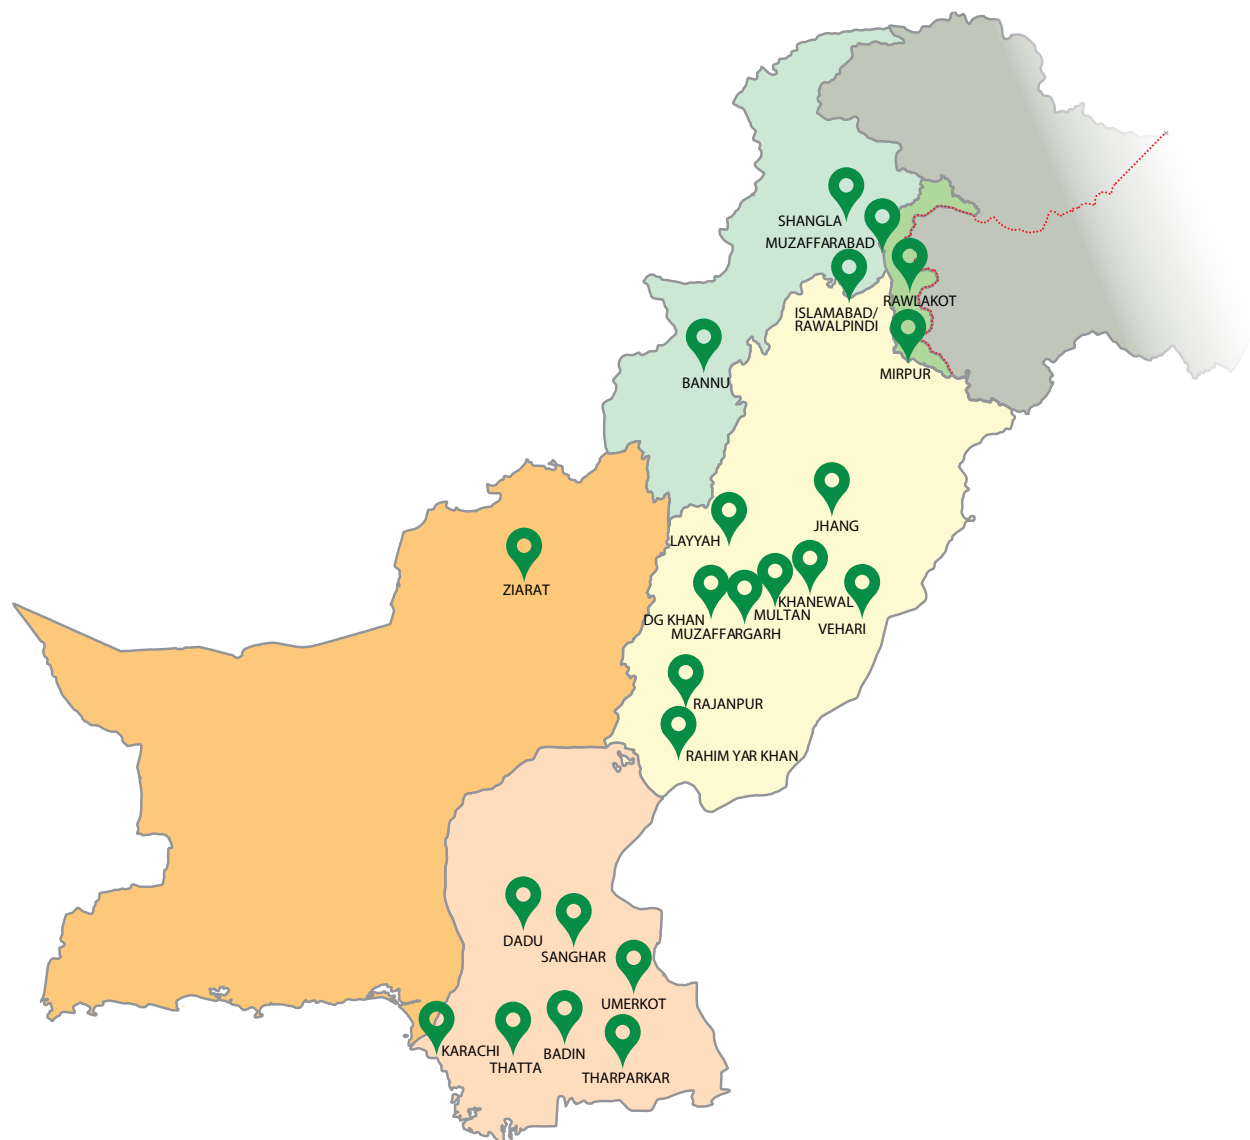

The organisation's work can be categorized in fowlling four areas;

- 1. Networking and Capacity Development initiatives for Impact**
- 2. Programs and Projects for Sustainable Development**
- 3. Relief and Rehabilitation of Disaster Hit Communities**
- 4. Acts of Kindness and Social Support**

Since its establishment, TNWF took various initiatives of social good and succeeded in developing innovative community development programs. These tested model programs can be replicated in changing the lives of poor and disadvantaged segments of the society.

### Geographical Coverage

### Objectives

1. To be the first response unit in time of disaster and assist the government departments, rescue & aid agencies in times of any crises, organize disaster management training when and where required.
2. To initiate development programs/projects to eliminate poverty and uplift the target communities, bring prosperity by collaborating with the entrepreneurs, governmental, national/ international organizations and philanthropists through natural resource management and capacity building.
3. To complement the government efforts of educating the nation by establishing educational (formal & Non-formal) facilities, providing required support to deserving talented students, mentoring and transfer of life skills to the students.
4. To take need-based initiative for girls and women so that they should become contributing members of their families and ultimately play an effective role in nation building.
5. To join hands with the government departments and other organizations to raise awareness among the community about climate and assistance in environmental conservation.
6. To conduct Social development activities and provide assistance to ultra-poor, persons with disabilities and underprivileged segments of the society without any relevance or regard to politics, caste, creed, color, race, and religion.
7. To unlock the youth potential by providing them career counseling, enhancing their capacity, engaging them in the development process and prepare them as a responsible & dignified citizen.
8. To make the social good/impact visible by sharing useful information/knowledge, strengthening networking among social/development actors, connecting professionals & community groups and replicating success stories.
9. To do research work, build the capacity and facilitate other social/development organizations, professionals and community groups to formulate policies for organizational development resulting in better service towards community development.
10. To adapt itself and create awareness among other development organizations & stakeholders on global development agenda by the government and UN.

# RESPONSE

*To Lessen The Suffering*

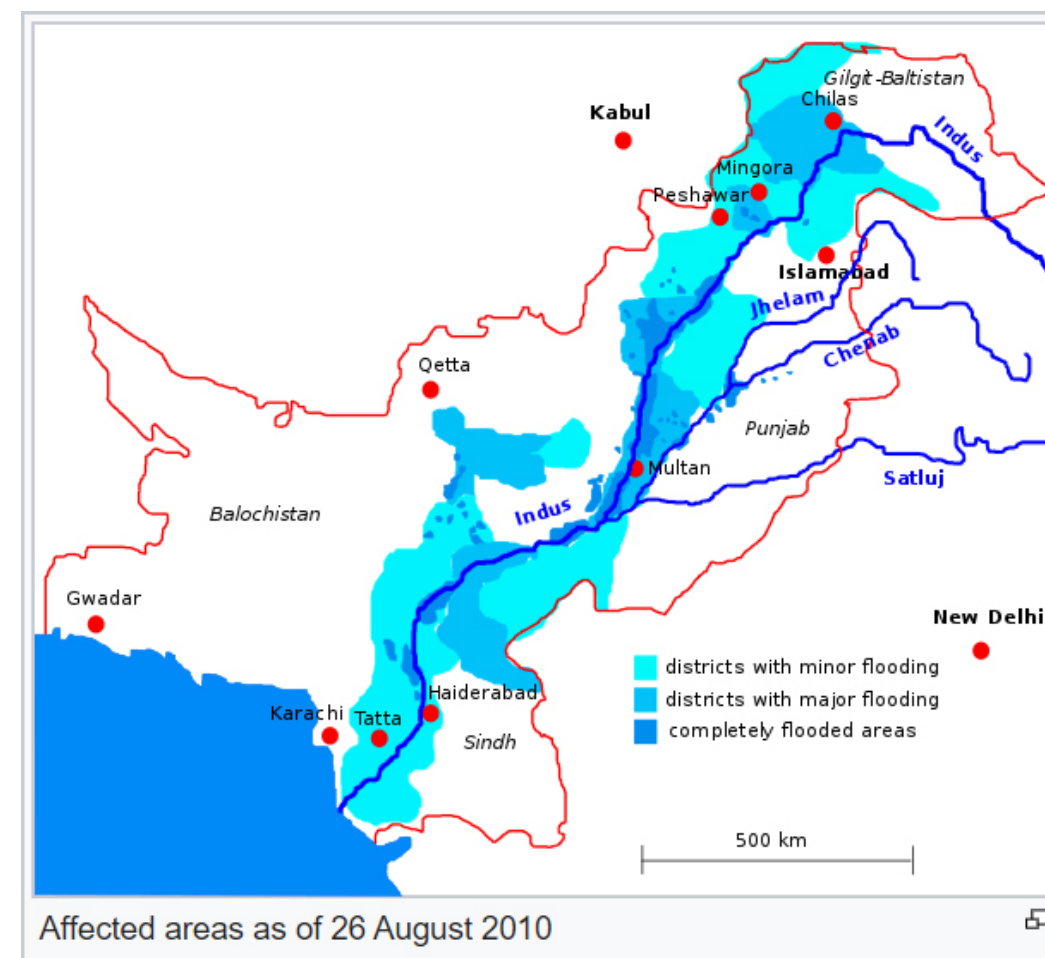

## RESPONSE to Flood 2010

The 2010 monsoon flood disaster in Pakistan was massive and unprecedented, killing more than 1,700 persons, affecting over 20 percent of the land area, more than 20 million people, and causing loss of billions of dollars through damages to infrastructure, housing, agriculture and livestock, and other family assets. Essential infrastructure including roads, bridges and markets has been severely damaged and many remain impassable. According to one of the United Nations surveys, it was assessed that some 10.1 million people were in need of shelter and humanitarian assistance. The number of people requiring food assistance to support recovery and rehabilitation is estimated at approximately 3.6 million. More than 1.1 million houses were completely destroyed or made un-live-able and more than 2 million hectares of standing crops were damaged or lost. The flood had a severe impact on people's homes, livelihoods and assets. Most people do not know when they would be able to resume their livelihoods.

Delegation of Deniz Feneri (Turkey) visited flood affected areas of Layyah and Muzaffar Garh districts. The visit was facilitated by the official of The NGO World. During the visit both teams witnessed the miseries and hardships of rural communities particularly women and children. After the visit a detailed need assessment survey was also conducted by The NGO World team. Findings and proposed solutions were submitted to Deniz Feneri. After discussions both organizations agreed to launch the response to lessen the sufferings of people in need. On 29th October 2010, both parties signed a mutual agreement for implementation of the proposed projects.

## Summary of RESPONSE Projects

RESPONSE	Situation	Number	Beneficiary Individuals	Period
NFIs Distribution	Floods 2010	7,711	53,977	Jan 2011 to Nov 2011
Restoration of Homebased Carpet Weaving Industry	Floods 2010	100	2,800	Jan 2011 to Nov 2011
Relief Items Distribution	Floods 2010	7,711	53,977	Jan 2011 to Jun 2011
Construction of Single Room Shelters	Floods 2010	100	700	Jan 2011 to Nov 2011
Rehabilitation of Feeder Schools of NCHD	Floods 2010	22	1,200	Jan 2011 to Nov 2011
Construction of Two Rooms Shelters	Floods 2010	30	210	Jan 2011 to Nov 2011
Installation of Biosand Filters	Floods 2010	1,000	7,000	Jan 2011 to Oct 2011
Construction of Masjid	Floods 2010	01	1,000	June 2011 to Oct 2012
Food Packs Distribution	Floods 2014	1,000	7,000	Sep14, 2011
Food Packs Distribution	Earthquakes 2015 KPK	300	2,100	Nov 15, 2015
Medical Camps Layyeh	Disastrous situation	05	1000	Jan 2011 to Jan 2012
Cataract Surgery Camps	Poverty	04	1,225	Oct 2018 to Feb 2020

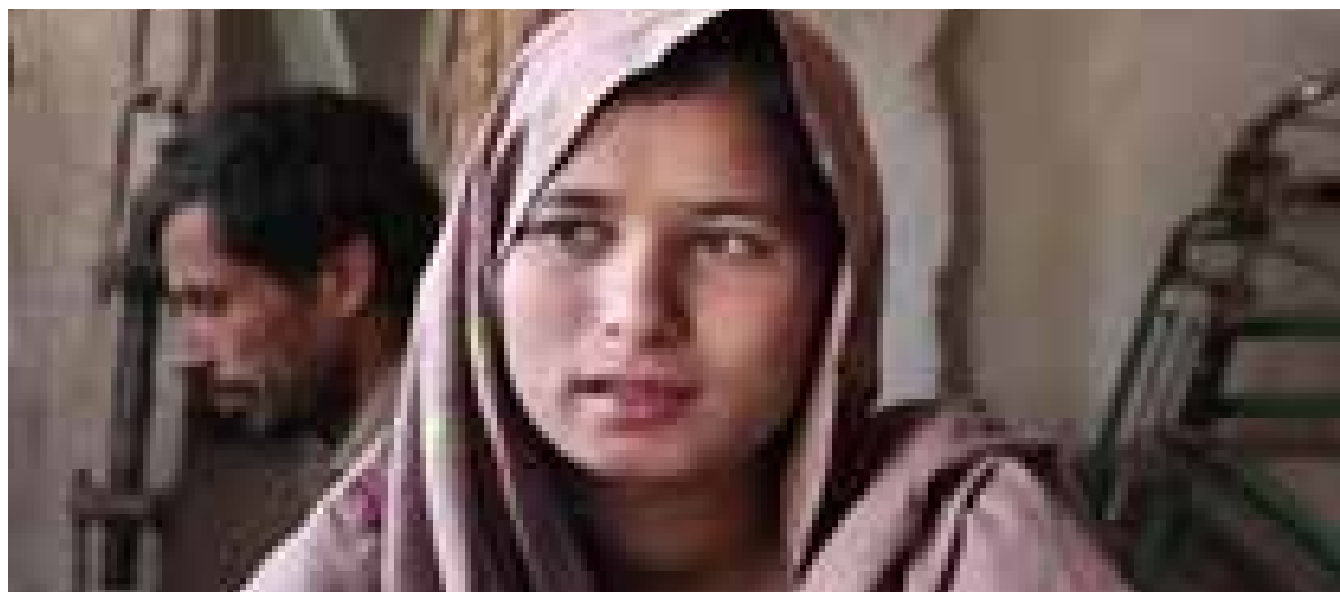

## Restoration of Home Based Carpet Weaving Industry

The floods of 2010 have caused a significant loss to poverty reduction efforts and would result in increase in poverty and vulnerability of affected population. The areas affected by floods were consistently lagging behind in terms of socioeconomic and educational indicators as compared to the areas unaffected by the floods. The loss to infrastructure and livelihood sources will push them behind further. The people most severely affected were predominantly small farmers and unskilled labourers. They are among the most vulnerable in Pakistan and almost all live below or just around the national poverty line.

During need assessment survey TNW team identified that In Layah district flood had destroyed 263 units of small scale household carpet industry putting livelihood of dependent families under severe stress. TNW designed a project for rehabilitation of this homebased cottage industry. The Deniz Feneri funded project focused on the revival of this small industry to restore their source of livelihood. The NGO World successfully completed the project for restoration of primary source of income of affected families by constructing the sheds and providing other related facilities.

**Total 100 sheds for selected beneficiaries were rebuilt, restoring the livelehood of around 400 families**

## Case Study

### (Shaista Supports her Family)

Ms. Shaista of village Tali Musa with her brother was helping her parents by using their small unit of carpet weaving installed a room that was the only bedroom for the whole family. After helping her mother in kitchen she was used to work (carpet weaving) for 4-5 hours daily and at the end of month family was having a reasonable amount to sustain their livelihood.

One day water of Flood 2010 entered their village and Shaista's family was shifted to a safer place. After few day when they came back they saw their room demolished and only source of income "Carpet weaving Unit" destroyed. It was difficult time for the family. The not only lost their only shelter but also the source of income. The situation created multiple hardships for them. Meanwhile our need assessment team visited that village and collected data. Team also witnessed the hardships of Shaista's family and submitted recommendations to support them immediately. The NGO World with support of Deniz Feneri built a permanent shelter for this vulnerable family and helped them reinstall their carpet weaving unit. Shaista and her brother were much happy after its completion as they were again on work and able to support parents once again.

## Relief Items Distribution

In an emergency situation, families often flee with little more than the clothes they are wearing and consequently find themselves displaced without any personal belongings. In addition to food, they urgently need certain non-food items to survive, including items for shelter (tents, plastic sheeting, blankets, sleeping mats), cooking (stoves, pots, fuel), and health and sanitation (buckets, soap, jerry cans, sanitary cloths, mosquito nets). Same happened during floods 2010 when thousands of families of southern Punjab were in emergency relief camps and were lacking essential items for daily use. Affected families lost their shelters and other important things of daily use.

To respond the situation, TNW received three containers containing food and nonfood items from Turkish donor organization "Deniz Feneri" and started distributions of these relief items both food and nonfood in different camps and villages. Major items include kitchen accessories, health & hygiene kits, blankets, clothes, shoes, beds, carpets, stationary, school bags, jackets and many other important things.

**During floods 2010, property was badly affected with 42 percent of houses completely destroyed. 19 percent heavily damaged and 28 percent lightly damaged. Only 9 percent of houses remained escape**

**TNW was able to distribute relief items, 230,000 in number (356 types) among the 7711 affected families at 72 locations of Southern Punjab districts including Layyeh and Muzaffar Garh. TNW also ensured women participation on equal terms in distributions and their management.**

TNW Managed to deliver these daily use items at the door step of affected people by maintaining the discipline and keeping their dignity. During distribution campaign TNW ensured to meet the following standards;

- The affected population has sufficient individual, general household, and shelter support items to ensure their health, dignity, safety and well-being.
- It has sufficient clothing, blankets and bedding to ensure their personal comfort, dignity, health and well-being.

- It has access to culturally appropriate items for preparing and storing food, and for cooking, eating and drinking.
- It has access to a safe, fuel-efficient stove and an accessible supply of fuel or domestic energy, or to communal cooking facilities. Each household also has access to appropriate means of providing sustainable artificial lighting to ensure personal safety.
- When responsible for the construction or maintenance of shelter or debris removal, it has access to the necessary tools, fixings and complementary training.

## Constructions of Permanent Shelters

According to updated reports of **NDMA** Pakistan in floods disaster **1,744,471** houses were damaged affecting population of **20,184,550**. In only Punjab province **497,700** houses were damaged affecting 06 million people.

In our target district of Layyah, affected population was **405,258** and Muzaffargarh affected population was **1,044,759**.

TNW designed two separate projects, single room and two rooms' shelter.

**Two Rooms Shelter:** In Layyah district, these are complete homes comprising of two bedrooms, veranda, kitchen and bathroom. **30** Target beneficiaries were most needy and vulnerable families especially, shelter less widows, orphans, disables or poor parents with large number of children particularly girls.

**Single Room Shelter:** In this category TNW provided single room construction material. **100** Affected communities of districts Muzaffargarh were benefited. During the survey of shelter less people (floods 2010) in UC Kotla Haji Shah of district Layyah TNW team identified a family headed by Mr. Allah Dad, comprising of **22** members. Old man with his three wives and 18 children was living in three separately fixed tents and bearing severe winter. TNW took initiative and constructed a complete home for this vulnerable family along with provision of required WASH facilities.

## Model Village

Sobaywala was a village of UC kotla Haji shah of District Layyah comprising of 500 families. During the devastating floods 2010 almost half of the populations lost their homes along with land due to erosion. Affected families were living in borrowed homes of landlords where they were continuously under mental and social stress especially women and children were facing hardships. TNW identified such families and put

## To Lessen The Sufferings

efforts to resettle them. The houses were built on a single shared location (kukar wala) like a small village with other requirements especially proper sewerage and arrangements for clean water. The renovated & reconstructed village was named **"Light House Village"** to compliment and acknowledge its donor association from our brotherly Country Turkey, project was funded by Deniz Feneri (Light House Association).

## Case Study

### (Allah Dad' Large Family)

During the survey of shelter less people (floods 2010) in UC Kotla Haji Shah of district Layyah The NGO World (TNW) team identified a family headed by Mr. Allah Dad, comprising of 22 members. Old man with his three

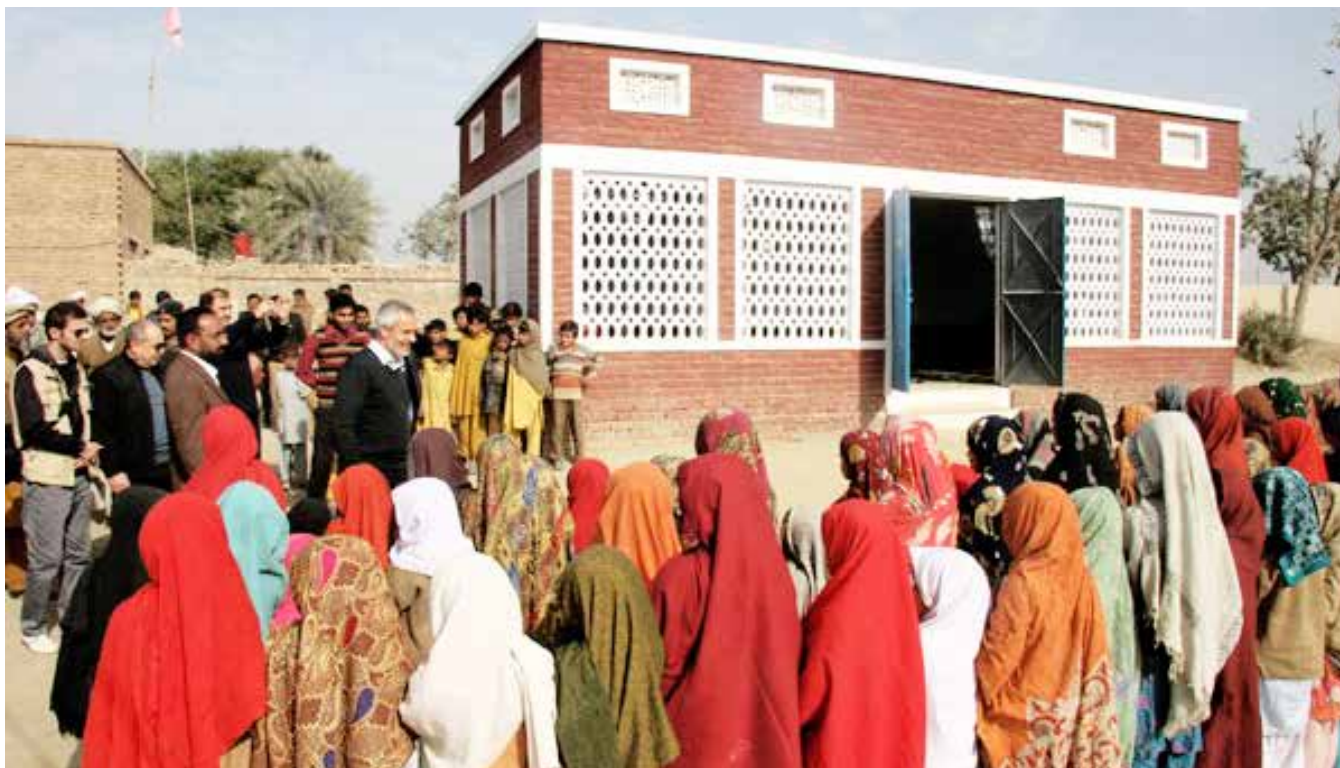

wives and 18 children was living in three separately fixed tents and bearing severe winter. His all assets and house were destroyed. He was unable to reconstruct a suitable shelter for his huge family. The vulnerable family was exposed to all climatic hazards and social stresses. With support of Deniz Feneri, TNW took initiative and constructed a complete home for this family along with provision of required WASH facilities. This effort was proved a great support for the children and women particularly.

## Rehabilitation of Feeder Schools

Floods 2010 affected educational facilities badly. "It could be months before affected children can get back to school. This is both because of the impact of floods on families and on the school buildings. Those in better shape are being used as relief camps and may not be vacant for a long time," an education department

official in Layyah, who asked not to be named, told The NGO World.

Maurizio Guiliano, a spokesman for the UN Office for the Coordination of Humanitarian Affairs (OCHA), told that "8.6 million children under 18 are affected. We are very concerned about them because they are very vulnerable".

UN Children's Fund (UNICEF) reported, 1.6 million children have been affected by damaged schools, or because the schools are being used as shelters.

In Layyah TNW identified that Flood 2010 completely devastated **22** Feeder Schools while creating problem for boys & girls to avail education facility at their door step. These one room schools were established in far off areas by National Commission for human Development in coordination district education department.

TNW arranged a visit of Deniz Feneri to some of these affected schools. The members of delegation interacted with students, teachers, parents and also government official and discussed the situation in detail. As follow up TNW conducted assessment survey and prepared a proposal for donor for rehabilitation of these schools.

With generous support of Deniz Feneri, TNW took the responsibility to rebuild these schools and revive

educational journey of the students of far off areas. Along with school building renovations & reconstruction, provision of furniture for teacher & students, stationary and bags was a major contribution.

**With the collaborative intervention, TNW was succeeded to restore the NCHD feeder schools to facilitate 1225 children to continue their education for brighter future.**

### Case Study

Village Adam Wali with population over 200 families is located right in middle of river Indus near district Layyah. Its situation is like an island. The only access to this village is by local made boats, donkey carts, tractor trolley and horses. At this location there were three feeder schools teaching around 150 students below the age of ten. These schools were totally demolished during the floods 2010 and students were forced to sit on mud while getting their lessons.

Our team took this hard target and put their efforts to manage the carriage of construction materials and skilled labor. It too around three months to rebuild these three schools. Our team also provided furniture, schools bags and other necessary items to facilitate children in getting education.

Providing this service at this very hard and risky was looking like a dream but commitment and love with little angles proved as a driving force and motivation.

## Construction of Masjid at Basti Chan

Village "Basti Chan" of Union Council Ghazi Ghat (Muzaffargarh) was badly hit by floods 2010. Whole population of the village was effected due to flood . After a month when families came back they found their houses were demolished and they had to live in tents and in temporary shelters. Where they were facing many problems, the villagers were also feeling risk while offering prayers as the masjid (mosque) of the village was also damaged and destructed.

During the need assessment surveys, The NGO World team and Deniz Feneri delegation visited "Basti Chan" and noticed the deteriorated condition masjid along with other destructions all around. On same day the delegation arranged a nazar qurbani program for the affected community and discussed the reconstruction

of masjid. Deniz Feneri with coordination of the TNW team prepared a project proposal for reconstruction the masjid. After the designing and paper work, under supervision of the civil engineer construction was started in 2011 and it took one year to complete the place of peace sufficient for 700 persons.

Project inauguration was held on Friday and a delegation from Turkey joined the ceremony. Mr. Ahmed Turan (Professor of Islamic Studies, Sultan Fateh University Istanbul) delivered a speech to the audience coming from Basti Chan and nearby villages. He expressed his views about the importance of Mosques in the Muslim communities and its role in religious and spiritual growth of the worshippers.

**The benefited community expressed their feelings of love, affection, brotherhood and thankfulness to the delegation for this great gift at their village. Imam of the masjid acknowledged the service and prayed for the prosperity, peace and development of Turkish nation.**

## Clean Water for Flood Affected Household

According to a research report "As a result of July–August 2010 flood 3999 water supply schemes and 2842 sanitation schemes were damaged, which resulted in the mixing of sanitation water with water for domestic use. This mixing produced extensive volume of contaminated water which became the basis of the spread of dangerous diseases among the affected community like gastroenteritis, hepatitis, cholera, typhoid fever and diarrheal diseases. Diseases like diarrhea are infectious diseases and are transmitted by the fecal-oral

route. Such diseases are termed as waterborne diseases. Many of the non-epidemic infectious diseases spread through direct contact with contaminated water. Some of these diseases are wound infections, dermatitis and ear, nose and throat infections. Many other water and sanitation related diseases are associated with water and solid waste and are number of times transmitted through vectors".

During the heavy Floods, Water passing over submerged areas picked up an unimaginable number of contaminants including, but not limited to, dangerous strains of bacteria and fecal matter from animals.

Keeping in mind the above dangerous situation and play role to save affected people from water related diseases, The NGO World proposed a project to Deniz Feneri "Provision of Biosand Water Filters".

A bucket of contaminated water is poured into the top of the biosand filter. The water simply flows through the filter and is collected in another storage container at the base of the spout. A biological layer (often called the biolayer) of slime, sediment and microorganism develops at the sand surface. Pathogens and suspended material are removed through various physical and biological processes that occur in the biolayer and sand.

When water is flowing through the filter, oxygen is supplied to the biolayer by the dissolved oxygen in the water. During pause times, when the water is not flowing, the oxygen is obtained by diffusion from the air. If

**TNWF with support of WHO took 250 water samples from the affected areas of Layyah and Muzaffargarh districts to assess the biological contamination in drinking water at the identified location of both districts. According to the WHO & PCRWR reports, 62% of the water samples were found bacteriological contaminated.**

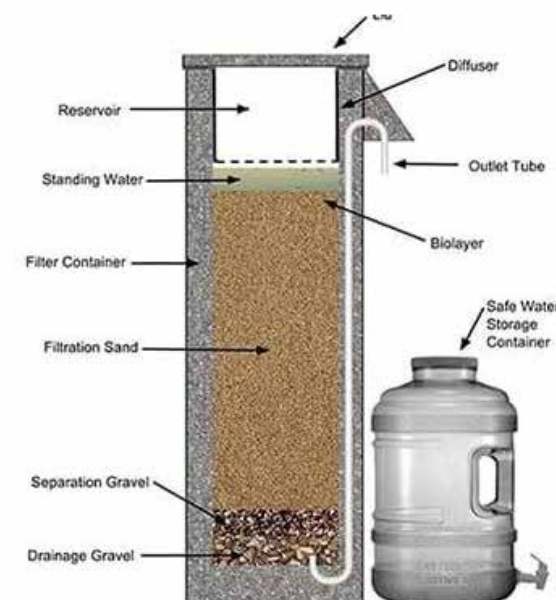

## To Lessen The Sufferings

the standing water layer is kept shallow, enough oxygen is able to pass through to the microorganisms to keep them alive and effective.

The identification of the solution was based on research studies. "A 6-month study carried out by Stauber et al (2006) in the Dominican Republic during 2005-06 was the first health impact study to be done on the household biosand filter. The results showed that the 75 households that used the biosand filter had 0.53 times the odds of diarrhoeal disease as control households (or 47% reduced risk), indicating a significant protective effect of the BSF against waterborne diarrheal disease. Work carried out during 6 months in 2007 in rural Kenyan households by Tiwari et al (2009) found that households using biosand filters had a 54% reduction in child diarrhoea days compared to control households".

**The NGO World provided Biosand water filters to 1000 flood affected families of district Layyah and Muzaffargarh along with necessary training of installation and proper use. The project helped the beneficiaries to fetch safe drinking water at their own house.**

### PARTS OF BIOSAND FILTER

## Awareness Raising

Our WASH team continuously remained active in raising awareness for proper health, hygiene and sanitation among the illiterate affected communities. Purpose was to keep these people safe from diseases. TNWF in collaboration with National Commission for Human Development (NCHD) established **Adult Literacy Centers** in Khanewal and Layyah districts. **175** female learners were enrolled to learn reading and writing skills.

## WASH & Health

TNW with support of Deniz Feneri completed following initiatives in WASH sector in flood affected areas of Southern Punjab districts of Pakistan.

**Latrines and Hand Pumps:** In district Layyah, **22** permanent latrines with essential sanitation were constructed in schools with missing facilities. Hand pumps were also installed in these schools. These interventions facilitated the poor young students to have proper sanitation and drinking water source. In Basti Light House Layyah, TNW built **30** latrines and laid underground low cost sanitation system.

**Awareness Raising:** Our WASH team continuously remained active in raising awareness for proper health, hygiene and sanitation among the illiterate affected communities. Purpose was to keep these people safe

from diseases. TNW in collaboration with National Commission for Human Development (NCHD) established **Adult Literacy Centers** in Khanewal and Layyah districts. **175** female learners were enrolled to learn reading and writing skills.

**Free Health Services:** During and after the floods affected people especially women and children faced serious health issues. It was routine activity of TNW to hold medical camps in flood areas with provision of free checkup & free medicines to the poor patients. Thousands got benefited and were treated with this humble health care intervention.

## Psycho-Social Care for Flood Victims

The flood caused unprecedented losses and damages to Pakistan's infrastructure, industry, houses, communications, and roads. This resulted in a creating a phenomenal humanitarian crises. The physical consequences of flood were quite evident in terms of death, disabilities, and displacement; however, the psychosocial consequences were less obvious. Where the major focus remained on meeting food, shelter and health needs at one end, the well-being of affected people and those rendered vulnerable also became the central concern in the days and weeks following the flood. Moreover, the need of psychosocial support and counselling was evident when assessing the emotional and mental state of adults and children alike. Many organizations have launched initiatives of psycho-social support in the relief phase for communities and individuals to help them cope with their emotions and restore well-being. This assessment has been carried out to identify the psychological / behavioral problems which have resulted after the floods and propose solutions and recommendations, however, before moving to findings, a homogenous understanding of the concepts has been provided below

This psychological assessment report was carried out to identify the psychological and behavioural problems of affected people after the flood and meant to suggest solutions

## Support to needy person

Under Gift Program we make efforts to create awareness of the needs and abilities of people with physical disabilities. The child, teen and adult who needs, but cannot afford. TNWF Foundation delivers the Hope, Mobility and Independence.

## Little Acts of Kindness

**Wheat Flour Distribution:** During floods 2010, affected families lost their stored wheat. As wheat flour is main food for the affected people so it was big nutritional problem for them to face. Keeping fact in view, TNW distributed 15000 KG of wheat flour among 750 affected families

**Sharing Eid Greetings:** Eid is a Muslim festival celebrated all over the world. TNW team celebrated Eid days among the disaster affected people and distributed gifts among most vulnerable and neglected segments of society especially women and children. During 2010 floods a vast majority of population in the flood affected area was homeless and needed our support to move on. At the time of sheer distress and desperation TNW distributed Eid gifts amongst the flood affected families and celebrated the event along with to express its solidarity, commitment and brotherhood.

**Marriage Gifts to Affected Brides:** It is our local tradition that poor village women collect dowry (Jahez) items since the birth of girls so that they may not face any problem at the time of her marriage. During the floods many girls whose marriage dates were already fixed lost their jahez. Their parents were under severe stress to arrange it again. Feeling the need TNW prepared jahez packages for 30 brides. These packages were delivered at their home without damaging their integrity. Packages contain 28 different items including clothes, shoes, blankets, mattress, kitchen accessories etc.

## Sharing Eid Greetings

Eid is a Muslim festival celebrated all over the world. TNWF team celebrated Eid days among the disaster affected people and distributed gifts among most vulnerable and neglected segments of society especially women and children. During 2010 floods a vast majority of population in the flood affected area was homeless and needed our support to move on. At the time of sheer distress and desperation TNWF distributed Eid gifts

amongst the flood affected families and celebrated the event along with to express its solidarity, commitment and brotherhood.

## Marriage Gifts to Affected Brides

It is our local tradition that poor village women collect dowry (Jahez) items since the birth of girls so that they may not face any problem at the time of her marriage. During the floods many girls whose marriage dates were already fixed lost their jahez. Their parents were under severe stress to arrange it again. Feeling the need TNWF prepared jahez packages for 30 brides. These packages were delivered at their home without damaging their integrity. Packages contain 28 different items including clothes, shoes, blankets, mattress, kitchen accessories etc.

## Successful Partnership

Executive Director "The NGO World" was invited to deliver a case study on successful partnership between donor "Deniz Feneri" and implementing partner "The NGO World" at UN conference on LDCs (civil society forum) Istanbul on 09-05-2011.

## Inauguration Of RESPONSE Projects

**On 25th of December 2011, The NGO World organized a grand inaugural ceremony of projects (Floods Pakistan 2010) at light House Village Layyah. Mr. Ahmad Ali Olakh (Minister Agriculture and Livestock Punjab) graced the event as chief guest. As a representative of Government of Punjab he presented a shield of special thanks to the president of Deniz fenri for their generous support of flood affected families.**

A delegation of Deniz Feneri led by its president Mr. Mehmet Cengez also visited Pakistan to inaugurate the projects completed by The NGO World under RESPONSE program launched after floods 2010. Secretary General of Deniz Feneri, board members, journalists and philanthropists were also part of this delegation. The projects related to shelter, drinking water, livelihood and education were completed in restoration and rehabilitation phases. The beneficiaries of these projects were from affected areas of district Layyah and Muzaffargarh.

## To Lessen The Sufferings

On the first day of the visit, President, General Secretary and Board Members of Deniz Feneri visited The NGO World office in Multan where Executive Director of The NGO World, Mr. Zafar Iqbal welcomed showed them the projects documentary and presented details of the projects. Mr. Zafar Iqbal also handed over concerned documents (project completion reports, goods receiving forms, official MOUs & letters, financial statements and details of beneficiaries).

On second day the delegation;

- Visited newly constructed Feeder School Baseera (Layyah) and delivered gifts to the students.
- Inaugurated newly established small village (Basti Turki) and delivered handing over letters to the beneficiaries.
- Visited Basti Chandia Khan to inaugurate the project on Revival of Carpet Industry. Carpet weaving community weaved a small carpet piece with the logo of Deniz Feneri.

Mr. Mushtaq Anjum (Deputy Commissioner Layyah) along with officials of district participated and acknowledged the efforts of both organizations regarding relief and rehabilitation of flood affected people. He presented letter of thanks & acknowledgement to General Secretary of Deniz Feneri on behalf of Director General, Provincial Disaster Management Authority (PDMA) Punjab.

President of Deniz Feneri, Mr. Mehmet Cengez presented a shield to Executive Director of The NGO World to acknowledge the hard work and quality services provided to the people in need.

## Disaster Management Exhibition-2012

Center for Disaster Preparedness and Management (CDPM) University of Peshawar in collaboration with Pakistan Science Foundation and ACF-Pakistan conducted the Disaster Management Exhibition on 7-8 November, 2012. Stalls (45) by different were displayed by different departments, National/International NGOs, UN agencies and various humanitarian actors. Chairman National Disaster Management Authority (NDMA) inaugurated the event while the Governor KPK also visited the exhibition as chief guest.

On invitation of CDPM, The NGO World actively participated and organized its stall to display the projects regarding disaster response completed in collaboration with Deniz Feneri. Models of projects (shelter, biosand filter, and schools), products, brochures and other related material were displayed.

Visitors, students, humanitarian & NGO's professionals and academic persons took interest and asked about the details of projects. Chairman CPDM and organizer of the event, Mr. Mushtaq Jan visited the stall

and appreciated our efforts for relief and rehabilitation of flood affected communities. The NGO World was awarded a shield on participating in the event by Chairman CPDM and its profile was included in the directory of exhibitors.

## Food Packs Distribution Floods Multan 2014

2014, Heavy rains and water released by dams in the Chenab river in India flooded vast areas and caused widespread destruction in various districts of Punjab province including Jhang, Multan, Muzaffargarh. The Punjab government declared a flood emergency in the province. Over 700 villages were inundated across Punjab, and standing crops on thousands of acres of land completely destroyed. Floods wreaked devastation

in districts of Punjab, leaving several areas cut off from the rest of the country. 1.1 Millions Peoples and 3000 villages have been badly affected by the floods so far.

TNW team has been visiting the flood affected areas including; Jhang (18 hazari, garh maharaja, ahmadpur syal) Multan (Muhammad wala, sher shah) Muzaffargarh. Miseries, food shortage Infrastructure damaged, Destruction of houses, Loss of livestock, Crops destroyed and Health issues were observed.

As immediate response TNW planned and distributed 1000 packs of food items among children. Food packs include; - 3000 packs of biscuits - 4000 milk packs and 1000 bottles of clean drinking water.

## Food Support to Earthquake Victims 2015

The magnitude 7.5 earthquake that struck Badakshan Province, Afghanistan on 26 October, 2015, also rocked Pakistan ruthlessly. After need assessment, TNW with support of deniz Feneri planned to distribute food packs among 300 affected families. In Shangla district, the packs were distributed directly among the 200 selected families based on their vulnerability, whereas in Bajour the government restrictions were followed and the food packs were handed over to FATA Disaster Management Authority.

## Cataract Surgery Camps (2018-20)

Considerable efforts are underway worldwide to minimize the huge backlog of curable blindness. The reasons include the lack of appropriate technology & human resources, lack of awareness and poor socioeconomic status being one of the major barriers to utilize the existing eye care services, especially in slums areas of Punjab, Thar and Karachi (Sind), where The NGO World is already working. Most of the people have no access to basic health. Eye care services are not available. People aged between 40-70 years are suffering from eye diseases. Which leads to partial or permanent blindness.

In view of above mentioned scenario, The NGO World in collaboration with Deniz Feneri (Turkey) successfully implemented a cataract surgery project (2018-20) for the elimination of avoidable blindness, which particularly focuses on:

## Objectives of Project

- To create adequate eye care facilities particularly in underprivileged areas. (clinic or monthly camps)
- To implement specific programs to control the major causes of blindness and eye issues
- To Intensified surgical intervention for Cataract (opacification of the lens), which at present accounts for half of all blindness.
- To Provide of spectacles.
- To make it affordable high quality eye care services would be provided

## Benefits of Project

- It provided adequate eye care facilities particularly in underprivileged areas
- This project helped to control the major causes of blindness and eye issues
- The focused project also helped in quality provision and facilitates people in the village free of cost

Location	Month	No of Surgeries
Karachi	October 2018	600
Karachi	March 2019	38
Balkasar	March 2019	350
Omerkot	February 2020	237
Karachi	November 2020	201

## Case Study

### (Ms. Meeram got back both eyes)

24 years old and mother of 02 children "Meeram" belonging to a poor family lost her vision from both eyes due to cataract surgeries. Living in far off areas of Thar Desert her family was unable to afford the expensive surgery. She was in difficult situation and taking care of two children was challenging for her.

In 2019, The NGO World with support of Deniz Feneri organized a free cataract surgeries camp in district Umarkot. With support of district headquarter hospital we were able to bring patients from villages and goths of THAR which were under severe stress due to water shortage and drought situation. Meeram was one of them. After examination our surgeons were hopeful that the surgery will bring her eye sight back.

**Her surgery was successful and was able to see from her both eyes. She was happy to recognize her children and mother once again.**

## COVID-19 Vaccination Camp for Rural Community

COVID-19 vaccination camp was organized by The NGO World (TNW) at its office in District Khanewal on 11 Aug-2021. The camp was inaugurated by Dr. Abdul Majeed CEO of the health department Khanewal. Camp started at 10:00am and continue till 3:00pm. In total 144 persons from rural areas of tehsil Kabirwala (both male and female) were vaccinated. Women health officer Dr. Malika malik also attended the camp. Dr. Abdul Majeed CEO of health appreciated the coordination and facilitation provided by the organization and its team members.

Chairman TNW, Mr. Zafar Iqbal on this occasion thanked Deputy Commissioner Khanewal and officials of the health department for organizing this important camp to provide vaccination service at the doorstep of common rural people.

## TNWF Ambulance Service

2nd September 2020, The NGO World Foundation (TNWF) launched free ambulance service under its RESPONSE program for the rural communities of tehsil Kabirwala, district Khanewal. Launching ceremony was held at field office Pul Rangu in which other than guests, community representatives and officials of The NGO World Foundation participated. Mr. Khalid Mahmood Khokhar (President PAKISTAN KISSAN ITTEHAD) graced the ceremony by his participation. He appreciated this action of Social Good.

Chief Guest of the ceremony Mr. Ghulam Mustafa (Assistant Commissioner Kabirwala) inaugurated the service along with TNWF board members and said" the free ambulance service is of great importance for the rural population. It will serve 24 hours and will be useful to lessen the difficulties of patients". He acknowledged the valuable contribution of The NGO World Foundation (TNW Foundation) for the sake of humanity.

## Water for Thar Project

Water for thar is an effort to provide drinking water for humans and cattle of Thar.

The Tharparkar district, spread over 22,000 square kilometres, is a chronically poor area which is often hit by drought as there are no rains over the years and shortage of water is the main concern. It's estimated population is 1.2 million, 95 % of which live in around 2,000 villages. Water shortage is a major problem, where dug-wells are the only sustainable source of groundwater. Villagers spend around four to six hours daily to fetch five to six litres water from these dug-wells, situated far and wide.

The social life of villagers is also restricted due to lack of adequate water. This especially affects women, who are responsible for carrying water. Young children often have to forgo education due to responsibility of fetching water.

With support of philanthropists and donors, TNWF is reaching the far off areas to digging wells and making arrangements to install solar powered water solutions to provide water for drinking and other usage.

## Renovation of School

The NGO World Foundation (TNWF) prepared the project for the renovation of the Government Primary School for Boys & Girls at Bangali Para, Karachi which consists 300 students, Renovation including classrooms, toilets, principal & teachers' rooms, garden and white wash to whole building. The school was founded in 1985 but it never undergone a major renovation like this.

Honorable Turkish Consul to Karachi Mr. Tolga UCAK, Mr. Ibrahim Carlos, Head of TRCS Delegation, Pakistan, Mr. Noor Ahmed Solangi, District Officer Education, District Malir, Karachi, Mr. Zafar Iqbal, Chairman TNWF, Haji Muhammad Shafi Jamot (Ex-MPA), Muhammad Hashim, Principle were graced the handing over ceremony organized by TNWF.

During the ceremony, the School's administrator and principal thanked TRCS & TNWF for its contributions. They said that delivering the highest quality academic environments can have in positively impacting the performance of students.

## Construction of Jamia Masjid Syedna Ibrahim (عليه السلام)

The Turkish Red Crescent has laid the foundation stone for restoring the 118-year-old Hazarat Ibrahim Mosque in a village of Jhang district, Punjab.

The mosque was built by local people in 1901. However, years of neglect have weakened its structure making it dangerous for worshippers praying inside.

## To Lessen The Sufferings

Chairman of The NGO World Foundation Mr. Zafar Iqbal proposed this project to the Director General of Turk Kizilay at its headquarter in Ankara Turkey. The project was approved by the board and started execution in October 2019.

This is the only mosque in that village and population of 3000 was forced to pray in open area. Management of the Turk Kizilay realized its need and approved this great gift to the residents of village.

During the ground breaking ceremony, the village representatives honored the Turkish guests with traditional turban and also presented them a model of mosque.

The projects will be completed in a year and inaugurated by the high level officials of Turk Kizilay.

The Historical Masjid was constructed in 1901. However, the structure of masjid was weakened making it dangerous for praying inside, therefore was decided by local community on 2017 to demolish it. As a symbol of Pakistan – Türkiye Brotherhood, this state of art was reconstructed by Turkish Red Crescent starting on 20 August 2019 and inaugurated for worship on 10th of March 2021.

The mosque, built in the village of Hokran Chak in Jhang district of Punjab province, was inaugurated by Turkish Red Crescent Secretary General Huseyin Can.

The organization's International Programs and Operations Director Alper Uluca, Turkish Red Crescent Delegation President in Pakistan Ibrahim Carlos Camilo and Zafar Iqbal, Chairman of the NGO World Foundation, also attended the ceremony.

Upon their arrival, the Turkish delegation was warmly welcomed by the local villagers and thanked for the construction of the mosque in their village.

Addressing the opening ceremony, Huseyin Can said it was a great honor to build a mosque in a brotherly Muslim country.

"Hazrat Ibrahim Mosque was built in 1901 and it was demolished in 2017 during the earthquakes in the region," Can later told Anadolu Agency.

Construction began in October 2019, but its completion was delayed for six months due to the coronavirus outbreak and restrictions in the country.

Can also prayed along with his delegation in the newly built mosque.

The mosque was built on 400 square meters and has a capacity of over 750 worshippers.

A religious seminary was also built on the premises of the mosque for the local children.

"The Turkish nation has not forgotten the friendship of Muslims of the sub-continent," Can said, referring to their assistance in the Turkish War of Independence.

Turkey has always stood behind their Pakistani brothers and sisters in difficult times of floods and earthquakes, he added.

## Gifts to School Childraen in Village of Jhang

8th October 2019, on invitation of The NGO World Foundation, a delegation of the Turkish Red Crescent led by General-Secretary Mr. Huseyin Can visited village 487 district Jhang. During the visit members of delegation met with students of government primary school and distributed gift packs to the young students. Gifts included stationery, toys and sweets.

## Food Packs Distribution Among the Poor Families in Jhang

8th October 2019, on invitation of The NGO World Foundation, a delegation of the Turkish Red Crescent led by General-Secretary Mr. Huseyin Can visited village 487 district Jhang. During the visit members of delegation distributed food packs to 100 poor families of the village. Community representatives and chairman of The NGO World Foundation delivered note of thanks for the honorable guests from Turk kizilay.

## Reflectors for Rikshaws and Donkey Carts for Road Safety

To prevent road accidents "The NGO World Foundation" has launched a self-help campaign to affix reflectors on rickshaws and other slow-moving carts.

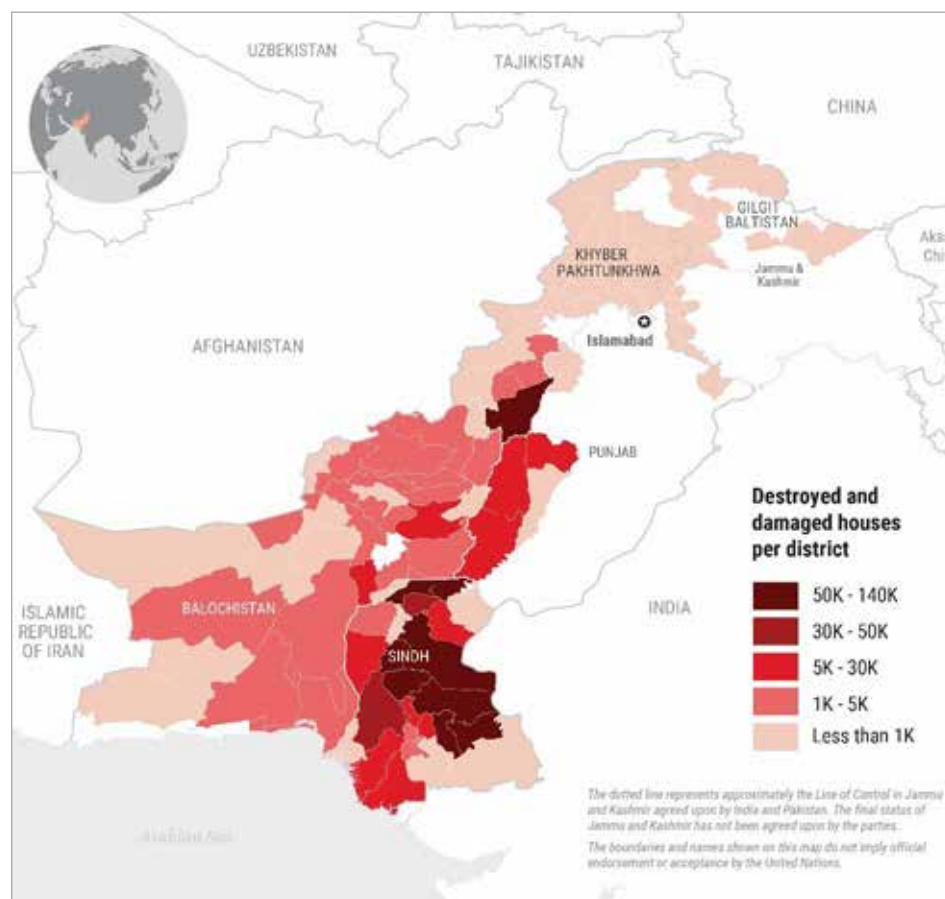

Khanewal: The donkey carts and bull carts are used for transporting goods, vegetables, and cattle feed to the city markets from fields. The auto-rickshaws are the main source of mobility for citizens in our small towns and cities. Young and old people in our rural and urban areas use rickshaws and donkey carts to earn a living. Many accidents happen due to fog especially when traveling on the roads at night. One of the main reasons for these accidents is the lack of reflectors on their vehicles. In accidents, drivers are sometimes injured and sometimes lose their precious lives. It causes loss of both lives and livelihood. On the same time families of the victims also suffer.

To prevent these accidents, the volunteers of "TNW Foundation" fixed reflectors on the rickshaw/donkey cart and highlighted their importance. Such measures will also create awareness among others.

## Pakistan Flood 2022

Pakistan has been enduring severe monsoon weather since mid-June, with rainfall equivalent to 2.9 times its national 30-year average causing widespread flooding and devastation. Millions of people have been affected and over a thousand people have been killed, with many more injured. Damage to houses and public infrastructure is widespread. The Government of Pakistan and the humanitarian community are delivering urgent lifesaving aid for people who have been affected, but humanitarian needs exceed current response capacities.

**436K**  
houses destroyed

**736K**  
houses damaged

**3.6K**  
kilometres of road damaged

**1.2K**  
deaths

**4.9K**  
injured

**733K**  
livestock lost

**2M**  
acres of crops impacted

Source: OCHA, data till 2nd September 2022

## To Lessen The Sufferings

Intensified rainfall and flooding over the past week have worsened the fragile humanitarian situation of people in already affected areas, and brought devastation to areas previously spared the brunt of the severe monsoon weather. Gilgit-Baltistan (GB) province has declared 'calamity hit' districts for the first time this season, and the number of calamity-declared districts in Khyber Pakhtunkhwa (KP) has nearly doubled. Nationwide, 80 districts have now been declared 'calamity hit' – 31 in Balochistan, 23 in Sindh, 17 in KP, six in GB and three in Punjab. Many more districts without an official declaration are also reportedly impacted. Around 33 million people have been affected by the heavy rains and flooding, according to the National Disaster Management Authority (NDMA). More than 470,000 people are living in collective sites, while many more are displaced and being hosted by other households.

Sindh and Balochistan remain the two provinces that have received the most rainfall this monsoon, each more than 5.5 times their respective 30-year-averages. Over 1.1 million houses have now been damaged or destroyed, with the number of destroyed houses doubling to over 436,000 and the number of damaged

houses rising by 63 per cent to over 736,000. This increase has been most pronounced in Balochistan, where the number of damaged and destroyed houses rose from some 29,800 to more than 61,000; in Sindh, where over 896,000 houses have been damaged or destroyed compared to just over 586,000 a week ago; and in KP, where the figure nearly quadrupled to over 76,000 houses damaged or destroyed since mid-June 2022.

Access continues to be a major obstacle to the delivery of aid and the ability of people to flee to safer locations. Two thousand kilometres of road and 98 bridges were damaged or destroyed over the past week, for a total of over 5,000 km and 243 bridges damaged or destroyed in the last 2.5 months. Most of this increase was incurred in KP, which reported nearly 1,600 km of damaged and destroyed roads as of 1 September, compared to just 7 km a week ago. Railways have also been affected. Destroyed railway bridges, submerged tracks and landslides have disrupted routes connecting Balochistan, Sindh and Punjab, including stretches between Quetta and Taftan; between Quetta and Habibkot via Sibbi; between Hyderabad and Multan via Rohri; and between Kotri to Dadu via Lakhi Shah.

The severe weather has continued to take a direct toll on human lives, with more than 1,200 people reported to have died, including 244 women, 526 men and 416 children. Nearly 4,900 people have reportedly been injured, including at least 2,670 women, 1,281 men and 816 children. The Pakistan Meteorological Department (PMD) indicates that high flood risks remain along the stretch of the Indus River between Taunsa in Punjab and Kotri in Sindh, while satellite-detected water extents mapped by the United Nations Satellite Center (UNOSAT) indicate preliminarily that of 793,000 km<sup>2</sup> of lands in Pakistan analysed between 1 and 29 August, around 75,000 km<sup>2</sup> appear to be affected by floodwaters, including some 48,530 km<sup>2</sup> that appear to be croplands. Initial estimates on the ground suggest that at least 3.6 million acres of crops/orchards across the country have already been affected, including over 35,500 acres in KP, 304,000 acres in Balochistan, 438,000 acres in Punjab and 2.85 million acres in Sindh. The livestock sector has also experienced severe losses, with over 733,000 livestock reportedly killed as of 1 September – 68 per cent in Balochistan and 28 per cent in Punjab.

Preliminary information indicates major damage to water, sanitation and hygiene (WASH) infrastructure. Initial estimates are that some 20 per cent of water systems are damaged in KP, around 30 per cent in Balochistan, and up to 50 per cent in the hardest hit areas of Sindh and Punjab. In Balochistan's Lasbela district, 19 water

systems have reportedly been damaged due to floods. The extent of reported damages across flood-affected areas requires further verification. Access to safe drinking water is a significant concern, and communities are increasingly resorting to open defecation, heightening the risk of water and sanitation-related diseases. Cases of diarrhoea and water-borne diseases, respiratory infection, and skin diseases have already been reported.

## Response by The NGO World Foundation

**...and whoever saves a life, it will be as if they saved all of humanity." (Holy Quran)**

As always, The NGO World Foundation is on the front lines, providing humanitarian aid from the very beginning. Our dedicated workers are working tirelessly and providing them with ration packs, cooked meals, shelters/ tents, and clean drinking water to survive. We are also carrying out medical camps, providing medical assistance to those affected and injured.

## First Phase (Relief):

In the first phase, The NGO World Foundation is immediately engaged in the following relief activities as per need of the affected families:

## Second Phase (Rehabilitation)

- In the second phase, The NGO World plans to provide Interest-free loans to help them establish their income generations set-ups
- Provide them livestock on partnership basis to sustain their livelihood
- Help them rebuild their houses (permanent shelter)
- Repair and renovate affected educational facilities (school etc)

## Foods Packs & Tents Distribution in Dadu

The NGO World Foundation with collaboration of Deniz Feneri distributed food packs and tents to the flood affected areas of Dadu, Sindh.
